

Indian Institute of Materials Management is pleased to announce the launch of its Member Certification Programs. This programme seeks to establish industry recognized standards for working professionals so that they may keep abreast of new developments in the fields of supply chain management, procurement, logistics and materials management.

Certified Professional Program: CMP, CSP, CLP

Professionals who participate in the certification programmes will:

- improve their skills on the various facets of supply chain management
- get a professional recognition which will improve their career prospects
- be abreast of the latest developments in the field
- join a select group of professionals and experts in industry

The IIMM Certified Materials Professional (CMP / CSP / CLP) programme recognizes the ability to understand and execute activities related to the respective field of SCM that are relevant to an organization. This certification is given only to experienced professionals in the respective domain of supply chain management.

The IIMM Certification will help the professional to:

- demonstrate their functional knowledge of materials, purchasing and logistics management
- have a consistent interpretation of terms, concepts and practices relevant to the Industry within their organization
- get an appreciation of the various software and IT tools that are utilized in the management
- enhance their position within their organization and their career prospects
- join a select band of expert professionals in this rapidly growing field

Validity of Certificate: To be renewed after 4 years

Certification:

Based on the stream selected, the certification will be awarded as:
