CASE STUDY

MNO Itd is a multinational company having its head office overseas and engaged in the field of health care products having three manufacturing units in India. Although company is having number of vendors on their vendor list, yet supply of quality materials rarely on time. This is stopping production line frequently. Back log of orders are increasing with every passing day. Customers are not happy with erratic supplies. Due to inadequate systems, poor visibility and other reasons, inventories are very high for the materials which are not required for the time being.

Mr X is appointed Head Purchase & assigned the task for streamlining the purchase operations & ensure uninterrupted supplies of the required materials. Company is looking for re engineering the total process to take care of above problems. Please help Mr X & suggest ways to improve the following:-

Answer the following questions:

- a) How to ensure uninterrupted supplies of required quality materials on time?
- b) How to build a strong base of responsive vendors?

c) How to improve the quality of components?

d) How to generate an effective communication & coordination system among all the three units & vendors for effective working?
